

EMERGING BIOTECH COMPANY SHOWCASE

June 3, 2021 | 9:00am

EVENT DETAILS

NewYorkBIO and the New York Stock Exchange (NYSE) have partnered to bring together New York's financial community and a group of emerging biotech companies that are developing novel therapeutics in areas which could revolutionize patient care. This event will focus on those ventures that are private, have raised significant capital, and are working on programs and platforms with the potential to significantly impact patients.

QUICK FACTS

Our inaugural event in 2019 included Schrodinger (now public), Kallyope (entering the clinic in 2021), and Sapience Therapeutics (currently dosing patients).

Our 2020 lineup included groundbreaking companies such as HiberCell, TMRW, OneDrop, HyperFine, and Emendo (since acquired).

In 2020, we hosted a panel on SPACS and the future of life sciences featuring Jonathan Rothberg (ButterflyNet, NYSE: BFLY), Adam Koppel (Bain Capital) and Jennie Dong (Head of SPACs, NYSE).

Complementary registration available at NewYorkBIO.org
